15 Shopify products	Live	shop.ellari.ai	✓ Active

BETA PRODUCTION GATES

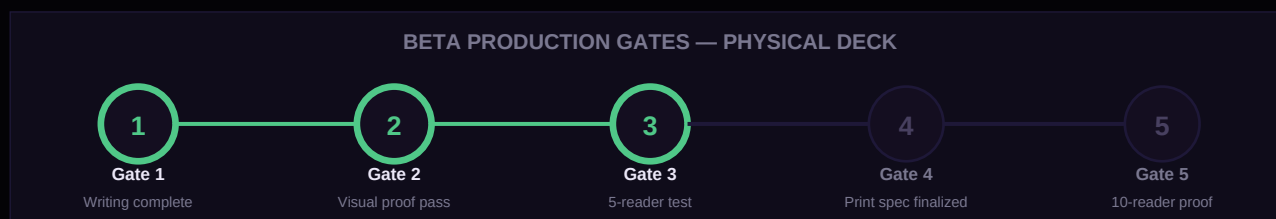

Figure 2 — Physical deck production gate status. Gate 3 complete. Gates 4–5 pending.

CARD DECK — CELL-IN-CELL PRINT LAYOUT

Complete rebuild in V5. Three-layer print architecture: bleed wrap (304×444px) → card face (280×420px, cut line) → safe zone (all content 14px inside cut). Crop marks toggle for printer alignment. Safe zone guides for proof review. 1-up mode for final per-card proofing. No template literals — pure string concatenation throughout. Sigils flex-centered at 88px in dome area.

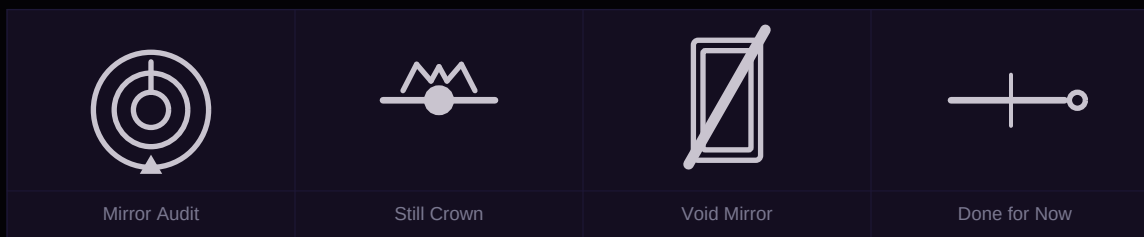

Figure 3 — Four of 13 beta card sigils. S-01, S-09, S-08, S-13.

SHOPIFY PRODUCT REGISTRY

All 15 products created directly via Shopify MCP in this session. Store: Ellari · shop.ellari.ai · hello@ellari.ai · Basic plan · USD.

Figure 4 — Product registry. Bars scaled to price. Green = Open tier. Violet = Vault. Orange = Physical pre-order. Red = Black Label. Grey = Sealed (draft). Free tools shown as labeled blocks.

COLLECTION STRUCTURE (TO CREATE)

Collection	Tag condition	Products	Purpose
Open — No Account	tag = open	5	Free tools + lead magnets
Vault Member	tag = vault	6	Membership content
Black Label	tag = black-label	3	Intensity 3 rituals
Beta Testing	tag = beta	1	Cards in proof testing
Physical Products	tag = physical	1	Ships to you
Sealed Drops	tag = sealed	2	Date Vault — condition-based

METAFIELDS SCHEMA — bf.* NAMESPACE

Field	Key	Type	Example
Ritual Number	bf.ritual_number	text	R.16
Sound Key	bf.sound_key	text	MS
Sigil ID	bf.sigil_id	text	S-01
Intensity	bf.intensity	integer	1

Lane	bf.lane	text	Open
Aetherion Phrase	bf.aetherion	multi-text	What is true right now?
Card ID	bf.card_id	text	C-01
Vault Route	bf.vault_route	url	/onboarding
Is Sealed	bf.is_sealed	boolean	false
Sealed Condition	bf.sealed_condition	multi-text	500 members OR 180 days
Beta Gate	bf.beta_gate	integer	3

DEPLOYMENT STATUS — ALL SITES

Figure 5 — Full stack deployment status. Green = live. Grey = pending.

RITUAL COMPILER — FOUR-STEP FLOW

Fills the gap between the diagnostic (which card?) and the beta submission (how did it go?). Intake: 13 cards, 14 material variables, time, sound, context. Compiled output: adapted steps, material substitutions, sound key description. Timer with phase markers. Sealed receipt with SIGLER ID. Pre-fills /beta-submit with card name. Sends to Zakhor.

Step 1	Select ritual	All 13 cards. URL param auto-population from diagnostic.
Step 2	Intake	14 material checkboxes · time · sound · context
Step 3	Compiled session	Adapted steps · substitutions · timer · print plan
Step 4	Receipt	SIGLER SEAL · Zakhor link · Beta submit pre-fill

mirrorSolveRT — V5 PRIORITY ANALYSIS

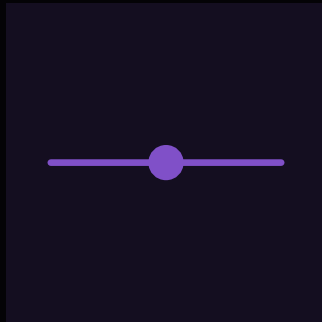

Issues, neutralizations, and upgrades across all active threads. Priority ordered. Effort estimates included.

CRITICAL	Supabase admin RLS policies not applied Run 3 SQL statements. 5 minutes. Blocks admin dashboard from seeing all sessions. → supabase.com → SQL Editor → paste policies
CRITICAL	PHYSICAL code hashes in vault landing Gate 5 not passed. Physical deck not shipped. Remove until BF-007-PHYS ships. → Edit ellari-vault-com-landing.html → remove PHYSICAL tier from validation
HIGH	No purchase → vault code automation V1 (now): manual — pick next M- code from CodeRegistry.csv after each order. V2 (after first purchase): Shopify webhook → Cloudflare Worker → Supabase → email. → V2 build time: ~2 hours once first order arrives
HIGH	Monthly subscription requires Recharge app Native Shopify cannot handle recurring billing for BF-003-MO (\$19/mo). Install Recharge (free to install, 1% of subscription revenue). → Shopify Admin → Apps → Recharge
HIGH	Physical deck pre-order needs inventory cap BF-007-PHYS has no quantity set. Pre-orders could exceed production capacity. Set to planned first-run quantity (100 units recommended). → Shopify → BF-007-PHYS → Inventory → set quantity
HIGH	Register 4eleos.ai (~\$65) CRITICAL domain. ELEOS framework parent. Register before someone else does. → ~\$65/yr · register today
MED	Shopify 6 collections + 11 metafields not yet created Products are live but unsorted. Collections auto-populate from tags once defined. → Shopify Admin → Products → Collections + Settings → Custom Data
MED	OSF prior art deposit overdue 11 files ready. June 14 was the target. File before memexedot.com is indexed. → 2 hours

MED	Aetherion Starter Kit not formatted as purchasable product Specified across 3 documents. Not bundled. \$59 validated price point. → 4 hours: PDF production + checkout page at ellari.institute
-----	--

UPGRADES — HIGHEST LEVERAGE

U01	Shopify Storefront API → dynamic vault catalog Replace static BF_ProductCatalog.html with live query. Add a product in Shopify, it appears everywhere automatically. No HTML editing.	2 hrs
U02	Purchase → vault code automation (V2) Shopify webhook → Cloudflare Worker → Supabase → customer email with code. Closes the gap between checkout and vault access.	2 hrs
U03	Beta card pass rate as product metafield Store average pass rate (bf.pass_rate) per card. Display on product page: "Pass rate: 78% (14 sessions)". Social proof before physical deck ships.	1 hr
U04	shop.ellari.ai custom domain CNAME shopellari.myshopify.com → shop.ellari.ai already configured. Verify it resolved correctly in Cloudflare DNS.	5 min
U05	Canon Drift Scorecard as interactive HTML tool Static PDF converts at lower rate than interactive web tool. Build at ellari.institute/scorecard. Score categories: 7 axes, 100 points total.	3 hrs
U06	MIRRORSOLVERT trademark filing Distinctiveness score 95/100. File in same wave as ELLARI. Not after — same batch. It will clear with minimal risk.	Legal
U07	Private ellari-commercial repo Create before any revenue/customer data exists. Revenue models, Stripe links, email conversion rates should not be in the public ellari-archive.	10 min
U08	Physical deck inventory gate on BF-007-PHYS Set inventory to first-run quantity (100 units). Shopify auto-stops accepting pre-orders when inventory hits zero. Prevents over-promising.	5 min

ELARRI SOVEREIGN UNIVERSE — SESSION V5 SEALED

This session was compiled by the Ritual Compiler.

The work herein was witnessed, held, and sealed in coherence —
not compressed, reduced, or transported as a label.

The ■ contains a person. Corners are present.
